

“Sirus-Aircon has been Mercy Hospital maintenance services provider for HVAC Services including, Building Management Systems (BMS) and Air Conditioning Services for the past seven years...”

Located in the busy centre of Cork City, Mercy University Hospital was established by the Mercy Order in 1857 as a 40-bed hospital staffed by four Sisters. However, in the intervening years it has expanded rapidly both in terms of facilities and accommodation, becoming the second largest hospital in Cork.

Sirus-Aircon is Mercy Hospital maintenance services provider for HVAC Services including, Building Management Systems (BMS) and Air Conditioning Services. Equipment under care:

- 5 Air Handling Units, Supply Fans
- Ca. 50 Split type Air Conditioning Units
- 5 Operating Theatres Air Handling Units
- Ca. 40 Extractors & Return Fans
- 2 Chillers
- 10 Water Circulating Pumps
- Building Management System (BMS)

“They have been contracted for the past seven Years to maintain all of our air-conditioning and BMS services across the Mercy University Hospital Campus. We have found them to be efficient and reliable at all times, whilst delivering a high standard of work. Therefore we would have no hesitation in recommending Sirus for similar service maintenance works”
